SHE IS VERY ACTIVE IN THE DEMOCRATIC PARTY WITH TOWN

4-10-17 - I checked several work orders today. I spoke to resident at 12 Allen ct. we repaired the drainage pipe in her side yard and the area has settled. We need to add more dirt into the area. Suzanne called about a hanger in a tree over the sidewalk between 84 & 88 waters Edge. There was a hanger ~~at~~ in the tree between 84 & 88, but no sidewalk. I ~~sp~~ FD2 also received a call from the Town Attorney about this hanger. The TA told FD2 the resident wanted the tree removed. ~~We want~~ I spoke to the resident at 88 who said she did not want the tree removed. No body was home at 84. Blue's crew removed the hanger. Any other work on the tree will have to be done by O&R as the tree is behind the wires.

4-11-17 - Jim Hunt has unpaid tickets & has until 4-15 to straighten it out or his license will be suspended. Closed door meeting between Steve Peters & FD2 this morning. Passed Steve Peters at his dad's house at 9 AM

4-12-17 - Another early morning <sup>meeting</sup> with Steve Peters who was late. The light guys were here again today.

4-13-17. Another morning meeting with Steve Peters. The Benbadier went back to town today to have the leak in the roof fixed. I called Culhane to come look at the ice machine that is not working. D. Malone sent the Menzi piston out and charged it to the plow shop. A.J. Falco & J. Davidson crews worked thru lunch to get the ~~blacktop~~ trench on Ridge Rd. blacktopped. The tree crew is still in Germords. The bid opening for the pick-up & dump truck will be on May 4 at 11:00 AM & 11:30 AM.

still closed.

5/21 - Today I found out that R. Kaminski will be made a Hms II next Tuesday. A guy who hasn't punched in before 7am in over 5 years. FD2 is making poor decisions for the future of this place. He is giving these guys positions to pad their retirements I found out by Kaminski accidentally telling me not from FD2 or Tucker. D. Werbeck was not officially told either. These are same things Wayne did toward the end of his career. There is no communication here.

5/22 OFF

5/23 - Today the game plan is to promote Kaminski & then one of the 3 off of the Hms I list which will kill the list. When Steve Peters retires to promote D. Salvo (Kim's cousin in law) off of the open competitive list. Salvo didn't fill the paper work out correctly was only able to the OC. When B. Schnepf did that his was told to bad & that he wouldn't be promoted. APWA show was today I saw vendors who I have dealt with for years that said they have to talk to FD2 or Tucker not me any more.

5/24 - Hoffman dropped off a Case Loader this morning. It's a nice machine, but not compatible with any of the attachments we already have. We would have to stock all new tires, filters, & parts for it. The Jet-vac is down. The crew overextended the boom & the mechanics can't get it back in. We have to buy a new piece.

5/25 - FD2 was in early this morning. He said Kaminski is coming in the office on Monday so Tucker can concentrate

can't handle the responsibility. Hennemann will take over the sign shop & he doesn't know who will fill the foreman's position. FDZ also stated Steve Peters last day 5/30 so we have 2 foreman's positions open. Discussion was had about Knutson Werbeck, Tucker says its not fair if he gets it because he only has 6 years here. I did not offer my opinion, but with his outside experience he would be the best choice. Apparently there is a problem with Tom's bathroom/lockerroom. B. McDonald reached out to FDZ about guys using it. FDZ asked D. Werbeck to talk to her and Rinel what she wants. Frank Trus came to measure dump bodies today. I had no idea he was coming. I used to handle this one more thing FDZ has cut me out of. KKunz is going to Jetvac to pick up the tube today. Also FDZ said there is no way he can salvo on the OC foreman's list. FDZ said Salvo called looking for another favor. MEOW was the first favor

is doing a basin for me at 27 Maple Rd. The tree

7) crew is doing a tree at 275 Old Mill. Phil Scala  
house again no discussion with me. Phil's FD2 are  
friends so I went from FD2 to Tucker to the tree crew.  
because this is for FD2 friend. Funny how I get reported  
to the ethics committee, but FD2 can do whatever he  
wants without repercussions. Also at last night's town  
board the board went into executive session & brought  
Al Maroni in with them. Looks like more patronage.

I cleaned my <sup>Tan</sup> pick-up out today the inside and bed  
were a mess. I also maintained my assigned chainsaw.  
I found another catch basin with a hole brenner drive.

11-1-18- New Month same issues. The light in the lunch  
room is still out & the power washers are still not working. (1)  
Tucker, P. Linderman, & C. Rickli want to do an inspection on  
the new Mack trucks today. Nothing was said to me & I  
was not asked to go. It is frustrating especially since  
I wrote the spec. 3 guys PJ Kunz, D. Naemitt, & Jumbo  
have not signed for their increment. Naemitt called & texted  
Tucker. Tucker never got back to him. PJ was told ~~not~~  
keep his mouth shut if he wants his increment. PJ  
said it was a waste of money to put \$50K into the 924  
loader that is n't even worth \$25K. PJ also voiced his  
opinion about putting too much money into truck 291.  
Tucker said he's not getting his increment because  
of his work performance and quality of work. I was  
wrong about the Old Mill tree it was not on Scala's property.  
On August 28 Al Canadeo ordered from a vendor that  
did not have a vendor #. He can't do that. (2)

1-15-19- The town ATTORNEY's recommendation is in for K. Kelly & Velez. The ATTORNEY recommends a 30 day suspension. Supposedly FD2 is going with this recommendation. I forgot to write last week T. West was assigned route 30 for leaf pick up. Tucker switched him to route 29 so the leaves in front of Naemit's house would be picked up. Naemit happens to be the head of the conservative party. Route 30 was then assigned 2 crews to play catch-up. This is why we didn't finish leaves until mid-January. Tucker is incapable of running this place. 3 guys are out salting ICE conditions today. Cunningham is in my area salting. We received an updated workplace violence policy via e-mail from the Supervisor. Tucker violates it on a daily basis.

1/16/19- Half way thru the month & the urinal is still not fixed, The light in the lunch room & Electrical closet vestibule are still out, The heater in the garage is still broken, Now the locker room heat doesn't work & the pressure washer's have not been fixed. All of these fall on Tucker who can't seem to get the job done. FD2 set up to do drainage on Tall Oaks Ln in Werbeck's area. When Tucker told Werbeck, Werbeck knew nothing about it & thought the problem had been fixed already. Knutsen is going to do the job with the mini-excavator. Salvo went out & pretreated after he washed out only roads that Tucker added to the pretreat list since the last time he sprayed. Golden & Naemit are not with their normal crews. It's been about a week both feel they are being targeted. I met FD2 at 43 North Conger Ave to discuss a drainage issue. The resident wants a catch basin in front of her house so she can tie into it. The problem is
